

DISCIPLINE FastFacts

from Academic Analytics

Collaborations with other disciplines most often involves researchers in Finance producing **5.3%** of co-authored **ECONOMICS** journal publications. The next two most frequent collaborative disciplines are Public Policy and Business Administration accounting for **4.1%** and **3.5%** of co-authored Economics journal publications. Do you know who are the top potential collaborators in these fields that best complement your research and where they are located?

Since **Academic Analytics** uses the individual researcher as the unit of record, we can look across all faculty in a discipline to view their current rank and the years since their most advanced degree.

FULL professor	ASSOCIATE professor	ASSISTANT professor
31.9 YEARS	18.7 YEARS	7.1 YEARS

Average academic ages (years since their most advanced degree) of Economists nationally

Percent of faculty ranks within the national discipline		
37.8%	33.5%	28.6%

How does the distribution of faculty in your department compare to the national averages, and what are the implications for planning?

Research Insight from Academic Analytics can help answer that.

Data from the Academic Analytics database indicate that

13.2% of **ECONOMICS** faculty currently receive federal funding.

The top sources of federal funding for Economics are the **National Science Foundation** with **54.8%** of all captured funding and the **National Institutes of Health** with **21.1%** of all captured funding. The **Department of Agriculture** and the **Department of Health and Human Services** round out the top four sources of funding.

There are **4,967** individuals in the **Academic Analytics** database who are affiliated with Economics departments.

Of the faculty population for whom we can infer gender

80.1% MALE	19.9% FEMALE
----------------------	------------------------

According to the data captured in the **Academic Analytics** database, **31.5%** of Economics faculty have received a national honorific award. The National Bureau of Economic Research confers the most honorific awards for the discipline, providing **24%** of all disciplinary awards. Of the faculty population for whom we have been able to identify gender, the distribution of awards granted by the National Bureau of Economic Research is **81.6%** of awards going to male scholars and **18.4%** going to female scholars.
